Corel VideoStudio – Section 508 Voluntary Product Accessibility Template

The purpose of the Voluntary Product Accessibility Template, or VPAT, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial "Electronic and Information Technology" products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, "e.g., equivalent facilitation." The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

* Changes: added Section 1194.41

Date: 2/14/19

Name of Product: Corel VideoStudio

Summary Table

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
Section 1194.21 <u>Software Applications and</u> <u>Operating Systems</u>	Applicable	Supports with exceptions
Section 1194.22 <u>Web-based Internet</u> <u>Information and Applications</u>	Not Applicable	
Section 1194.23 <u>Telecommunications</u> <u>Products</u>	Not Applicable	
Section 1194.24 <u>Video and Multi-media</u> <u>Products</u>	Not Applicable	
Section 1194.25 <u>Self-Contained, Closed</u> <u>Products</u>	Not Applicable	

Section 1194.26 <u>Desktop and Portable</u> <u>Computers</u>	Not Applicable	
Section 1194.31 <u>Functional Performance</u> <u>Criteria</u>	Applicable	Supports with exceptions
Section 1194.41 <u>Information</u> , <u>Documentation and Support</u>	Applicable	Supports with exceptions

Section 1194.21 Software Applications and Operating Systems – Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported	All features are keyboard accessible
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	VideoStudio does not disrupt, disable or otherwise interfere with activated 508 accessibility features of other products.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	supported	VideoStudio uses standard indications of screen focus and Tab-key movement between fields in our dialogues.
(d) Sufficient information about a user	Supported	VideoStudio uses

interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.		text-based "tool tip" pop-ups for most tool icons
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported	VideoStudio provides consistent and appropriate textual information.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported	VideoStudio uses standard Windows controls for writing text to the screen.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Don't support	VideoStudio overrides Windows Color Schemes in major parts of the UI for a more unified interface. Note that, as an imaging program, using high-contrast Windows themes is not appropriate due to the need to be able to see image subtleties while using the software.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supported	VideoStudio does not depend on animation in the user interface
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	VideoStudio does not use color coding to convey primary user interface attributes.

		However, as a color image editor, some interface elements (such as color picker) do require color vision to use.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Don't support	VideoStudio doesn't support to let users adjust the color and contrast of the user interface.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	There are no flashing elements in the Video Studio user interface
(1) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	The registration is done while installing the program, no electronic forms available.

Section 1194.31 Functional Performance Criteria – Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Don' t support	Retrieving information about video elements and other information on the timeline is not supported for screen readers. There is limited access to dialog boxes using assistive technology.

(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Limited support	Some interface elements use small graphics as icons, which are not resizable.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supported	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Limited Supported	Simultaneous mouse and keyboard actions are required for some commands. Adjust the video/audio effects in the timeline requires fine mouse movements.

Section 1194.41 Information, Documentation and Support – Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported
