We are pleased to provide you with the MHEC 2019-2020 Annual Report and share the significant work that MHEC staff, commission leaders, committee members, and the commission accomplished during a year of unyielding upheaval in every aspect of life.

MHEC faced substantial challenges this year and managed to successfully combine traditional methods with new approaches and opportunities to communicate, accomplish work, and achieve our goals. We held in-person and later video-based state meetings that engaged state commissioners in meaningful discussions. MHEC advanced its mission to sustain and advance affordable, high-quality education for students within MHEC states and beyond. We continued to provide significant cost savings through our programs and contracts – this year savings amounted to over $141.10M for our member states.

Throughout the year we utilized our new Strategic Framework, to guide our overall efforts and now look to develop a new communications approach tied to our framework and informed by commissioner and staff feedback. Our outstanding, innovative, and hard-working staff quickly adapted to these difficult times with positive spirit and dedication to MHEC’s mission. We also thank our outgoing officers (Chair Olivia Madison, Vice Chair David Eisler, Treasurer Rick Carfagna, and Past Chair Ken Sauer) and appreciate their dedicated leadership, wise advice and counsel, and support as we navigated this daunting year. We benefited from the work of our two commission committees, Finance and Audit (chaired by Representative Carfagna) and Ad Hoc Governance (chaired by Representative Ballard). They worked hard to provide additional structure, clarity, accountability, and focus to the Commission’s finances and organization. MHEC also has highly valued committees of volunteer practitioners and experts that support and provide expertise for our diverse contracts and programs.

Fortunately for now, MHEC’s current financial situation is strong with a healthy revenue mix from its members states, contract and program revenue, and growing philanthropic support. As a result, the Commission approved a one-year postponement of the upcoming 1.5% State Commitment increase.

Our national leadership and collaborations remain strong with the Council of State Governments - Midwest Office, Midwestern Legislative Conference, State Higher Education Executive Officers Association, and Higher Learning Commission as well as with our sister compacts, the New England Board of Higher Education, the Southern Regional Education Board, and the Western Interstate Commission for Higher Education. We also benefited from philanthropic support for several initiatives, including two significant grants from the Hewlett Foundation and Ascendium Education Group, Inc. to support Open Education Resources (OER) and credential transparency.

We are grateful to all who have helped MHEC learn, grow and change for the better this year. In conclusion, MHEC is committed to identifying how we may best serve, support and add value to our member states and provide ways for sharing innovative educational approaches and program participation. We have every reason to look forward to a successful 2020-21 as we continue our commitment to higher education throughout the Midwest.

Sincerely,

Susan G. Heegaard
MHEC President

Olivia M.A. Madison
MHEC Chair, 2019-2020
Professor Emerita and Dean Emerita of Library Service
Iowa State University
Created in the early 1990s, the Midwestern Higher Education Compact was established through the enactment of legislation recommended by the Midwestern Legislative Conference of The Council of State Governments and is funded by member state commitments, program income, and foundation grants.

All 12 eligible Midwestern states defined by the Compact have passed legislation to become members. The states align with the Midwestern Legislative Conference region and the Midwest Census region.

The convenings, programs, contracts, and policy & research originating through the Compact are available to all public and private nonprofit institutions of higher education in the Midwest. When the opportunity emerges, MHEC also extends some contracts to K-12 districts and schools, cities, states, and local governments.

Uniquely governed by a 60-member commission of legislators, governors’ representatives, and higher education leaders, two of the Compact’s commissioners are appointed by each state’s legislature and three are generally appointed by each state’s governor. Representation also includes 21 commissioner alternates.

The entire commission meets annually and the commission’s Executive Committee meets semiannually. Meeting locations rotate among the member states.

*North Dakota and South Dakota are members of both MHEC and the Western Interstate Commission for Higher Education (WICHE).
MHEC provides convening opportunities for member states to connect for the purpose of exchanging expertise, sharing ideas and experiences, and collaboratively pursue efforts that help further higher education. This leads to programs and activities that produce outcomes and results ranging from the dissemination of knowledge and expertise about practical solutions, to leveraging the collective purchasing power of the region to achieve efficiencies and savings. MHEC covers the cost of these meetings, for commissioners and committee members, including the travel expenses of participating attendees.

**COMMISSION MEETINGS**

Once a year MHEC convenes its full governing body to conduct Commission business, learn about what is happening in the other MHEC states, showcase higher education related state and regional success stories, hear presentations on the ever-changing higher education landscape, and exchange best practices on higher education issues facing the Midwest. A policy focus on pressing issues featuring experts and their presentations is a part of the annual meeting. Along with the MHEC Commissioners, MHEC invites other legislators and higher education leaders from the region to attend. The Executive Committee meets twice annually.

**ANNUAL STATE VISITS**

At least once a year the MHEC staff visit each member state of the Compact typically in the state capitol city, to hold a meeting with that state’s commissioners. Key legislative leaders, as well as state higher education officials are also invited to attend these meetings. During these meetings staff reports on MHEC activities taking place in each state, listens to ideas and concerns, and shares ways to better leverage MHEC.

**ADVISORY COMMITTEES CONVENE**

MHEC brings together committees of practitioners and subject-matter experts with regularity to share knowledge and expertise on issues facing higher education, advise the Compact, and brainstorm on ways to address these issues. These committees help to continually improve and evaluate programs and contracts, enabling members to problem solve with similarly situated thought leaders in their field. For example, over the past year MHEC hosted colleagues from around the region for the Master Property Program’s Loss Control Workshop, Midwestern-State Authorization Reciprocity Agreement Annual Meeting and Multistate Compact on Military Credit (MCMC) Annual Meeting.

**VIRTUAL MEETINGS AND WEBINARS**

This past year, virtual meetings were a key way in which MHEC members engaged with one another. MHEC offered numerous ways to connect with stakeholders throughout the Midwest and beyond via virtual meetings and webinars that addressed pressing issues throughout the region. Topics included: the impact of COVID-19 and the accompanying challenges and opportunities for higher education, broadband access, accessibility, and Open Educational Resources (OER) for career and technical education.
In an effort to develop greater alignment, the Compact’s policy related programs and research areas were combined this past year.

**CONCURRENT ENROLLMENT**

Concurrent enrollment (also referred to as dual enrollment) provides high school students the opportunity to take college credit-bearing courses.

MHEC has brought together member states to gather input and develop a collective voice to address the Higher Learning Commission’s (HLC) recent guidelines on more stringent faculty qualifications by 2023. This change requiring teachers to attain additional credentials in order to teach such courses, has presented significant access challenges for students in many states.

MHEC staff continue to work with stakeholders and HLC to find common ground and practical resolution to this challenge and support three advisory groups to address different aspects of the teacher supply dilemma.

Next steps include:

- **Thought Paper.** MHEC staff are developing a thought paper showcasing innovative ways institutions are developing graduate courses and programs for current and aspiring concurrent enrollment instructors.

- **Searchable Course Database.** MHEC and the Northeast Wisconsin Educational Resource Alliance (NEWERA) aim to launch an interactive web-based search tool, Graduate Credit Quest (GCQ), which will allow teachers from all 12 MHEC states to search for online graduate courses offered by Midwestern universities and designed to help them meet HLC’s credentialing expectations.

- **Events and Opportunities.** MHEC is working with the National Alliance of Concurrent Enrollment Partnerships (NACEP) and the College in the High Schools Alliance (CHSA) to create more events and opportunities to address the teacher pipeline issue, examine state level concurrent enrollment practice and policy alignments, and promote the use of Open Educational Resources (OER) in concurrent enrollment courses.

**MULTI-STATE COLLABORATIVE ON MILITARY CREDIT**

MCMC facilitates an interstate partnership of the 12 Midwestern Higher Education Compact (MHEC) states plus Kentucky (other states are welcome to join) focused on translating competencies acquired by military-connected students and veterans to college credentials that lead to successful employment in the civilian workforce. This work was initially supported in 2015 when grants were awarded to MHEC by the Lumina Foundation and the Strada Education to address barriers for military-connected students to access, participation, and completion in postsecondary education.

MCMC in partnership with the National Center for Higher Education Management Systems (NCHEMS), was awarded additional funding of $25,000 in late 2019 from the National Research Collaborative for Competency-Based Education and Learning and from Lumina Foundation. The funding supported a multi-state scan of military postsecondary credit policies and practices.
OPEN EDUCATIONAL RESOURCES (OER)

(OER) are textbooks and ancillary learning materials accessible via the Internet at little or no cost to students or institutions and openly licensed so that users can modify, share, and retain them. To make the cost of postsecondary education more affordable and effective, many states and institutions have adopted or are seeking to adopt the use of OER.

MHEC has worked to assist states and institutions in OER implementation by creating an advisory committee composed of institutional representatives from across the Midwest.

In 2018, a group of stakeholders gathered for the OER Policy and Implementation Summit for the MHEC states to share OER policy and best practices, analyze status of ongoing efforts, and devise action plans for increasing use of OER in MHEC states. OER-related webinars that reach a wide range of stakeholders and inform them of the work of the 12 state OER teams and other related work nationwide are ongoing.

MHEC and the other three regional compacts—New England Board of Higher Education (NEBHE), Southern Regional Education Board (SREB), and Western Interstate Commission for Higher Education (WICHE)—have received a planning grant from the Hewlett Foundation to devise a nationwide collaborative OER support strategy.

MIDWEST STUDENT EXCHANGE PROGRAM

Since 1994, the Midwest Student Exchange Program (MSEP) offers reduced tuition rates to students in the states of Illinois, Indiana, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and Wisconsin. Michigan is in an inactive status, and Iowa and South Dakota elected not to participate in the 2019-2020 academic year. This program is similar to those offered by the other three regional compacts.

Similar to the other three regional compacts, MSEP serves as the Midwest’s largest multi-state tuition reciprocity program allowing students to attend out-of-state institutions at reduced costs. Public institutions enrolling students under the program agree to charge no more than 150% of the in-state resident tuition rate while private institutions offer a 10% reduction on their tuition rates. Nearly 60 campuses from participating states have opened their doors to students at reduced rates. A comprehensive report is underway, that will include national scan, research and thorough program review to determine the current relevance and value of the program.

Some of the benefits include:

- MSEP savings totaling over $81.11M for students and their families in FY20. Actual savings through the program varying from institution to institution depending upon the tuition rates.
- 10,986 students participating in the program.

MIDWESTERN-STATE AUTHORIZATION RECIPROCITY AGREEMENT (M-SARA)

The Midwestern-State Authorization Reciprocity Agreement, or M-SARA, provides a voluntary, regional approach to state oversight of postsecondary distance education. When states join SARA -- membership is voluntary -- they agree to follow uniform processes for approving their eligible institutions' participation in SARA. They also agree to deal with other states' SARA institutions in a common way. SARA's uniform standards and policies provide benefits to both states and institutions offering distance education in multiple states. Since 2013, this approach has streamlined, improved, and added consistency to the efforts institutions must take to offer distance education programs or courses across state lines, saving people and institutions both time and money. The M-SARA Regional Steering Committee and the Midwestern SARA State Portal Agents meet quarterly, with an annual meeting taking place in July. 49 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands are members of SARA.
Some of the benefits include:

- Saving Midwestern institutions an estimated $16.05M in FY20.
- Participating SARA institutions exceeds 2,000 nationally with 573 of the participating institutions located in MHEC states
- NC-SARA with compact and state involvement launched a Professional Licensure Directory and made it publicly available. The directory provides contact information for five programs (counseling, nursing, psychology, social work, and teacher education) that lead to a professional license.

TECHNOLOGIES COMMUNITY

The MHEC Technologies Community includes a diverse range of technology experts from across the Midwest. Technology's role in higher education is increasingly diverse, continually evolving, and embedded in the day-to-day work of many institutions. Innovators and specialists from technology, academia, students, and administration provide strategic guidance to MHEC on technology-related topics in support of the mission of higher education institutions, systems, and states in the Midwest. The Technologies Executive Committee also provides strategic advice and counsel to MHEC.

Projects were approved and moved forward in the areas of accessibility, technology community, and IT security services.

Some next steps include:

Addressing Regional Technology Needs. Work will continue with The Technologies Executive Committee to identify how to structure MHEC’s approach to best serve the technology needs of MHEC states and institutions. Research will also continue on the feasibility of projects such as a pilot programs around digital fluency, universal broadband services, and assessment of institutional demand/need for online program management (OPM) systems.

RESEARCH

MHEC’s research efforts are intended to inform institutional and state efforts in improving postsecondary policies, practices, and outcomes. MHEC supports the work of our commissioners, state legislators, executive branch, and agency staff, institutional and system leaders, and the broader community of higher education administrators and researchers in several ways:

- Maintaining a repository of expertise, knowledge, and best practices for guiding policy and practice;
- Conducting applied research and analysis on critical topics in higher education;
- Developing innovative approaches to improve educational opportunity and effectiveness; and
- Providing public outreach and service to institutions and governments.

Some requests and projects are long-term while others are immediate and time sensitive.

Recent initiatives include:

- Interactive Dashboard. The online dashboard allows users to select from a comprehensive set of indicators and provides several options to tailor the data, including multiple years, peer state in the U.S., various figure types, disaggregation by race/ethnicity and family income, and easy exporting of figures and tables as a PDF or PowerPoint. MHEC will update the dashboard with data released in 2020 and continue implementing feedback received from interested stakeholders: [https://www.mhec.org/dashboard](https://www.mhec.org/dashboard).

- Higher Education in Focus. This biennial report is intended to inform public discourse on higher education by providing key performance indicators relevant to the goal of increasing educational attainment. Performance indicators are categorized within five key areas of focus: preparation, participation, affordability, completion, and finance.
POLICY & RESEARCH

- **College Student Debt Report: What State and Institutional Leaders Should Know.** MHEC produced a policy report that examines recent trends in student loan debt, the amount of debt accumulated during college by race/ethnicity and family income, research on the effects of debt accumulation, and policy options for institutions and states to reduce student reliance on loans.

- **The Effect of State Appropriations on College Graduation Rates of Diverse Students study.** This national study estimates the effect of state appropriations on the graduation rates of freshman cohorts by race and ethnicity. Results will be presented at a 2021 SHEEO conference on public funding for higher education.

- **Digital Divides at the University: Lessons learned from the COVID-19 Emergency Transition brief.** MHEC produced a research brief on the digital divide and its implications for college students. Findings were presented from large-scale surveys of the COVID-19 emergency transition conducted at Indiana University and The Ohio State University, including both the flagship and regional campuses.

College Student Mental Health in the Wake of COVID-19 Initiative. MHEC is exploring a potential collaboration with a research team in Michigan to examine the impact of COVID-19 on student mental health, assess the effectiveness of institutional responses, and provide recommendations for policy and practice.

MHEC welcomes input, ideas, and suggestions regarding our research agenda for the coming years and beyond.
MHEC programs are initiated in response to identified needs in one or more of the member states. Bringing together expertise from across the region, MHEC explores activities needed to address the identified needs. Solutions best solved through ongoing interstate cooperation are then developed into MHEC programs. Each MHEC program provides the program participants with governance and leadership structures to guide and maintain programmatic outcomes, often there is a cost savings component.

**PROPERTY INSURANCE**

MHEC’s Master Property Program (MPP), developed in 1994, broadens property insurance coverage, reduces costs, and encourages improved asset protection strategies for Midwestern 2- and 4-year colleges and universities. More than 180 campuses with total insured values of nearly $83B participate in the MPP.

Under the direction of the MPP Leadership Committee, composed of representatives of the member institutions, the MPP is a premier property insurance program for institutions from MHEC, the Western Interstate Commission for Higher Education (WICHE), the New England Board of Higher Education (NEBHE), and the Southern Regional Education Board (SREB). The program is focused on strategic growth, program stability, and member value. MPP underwriting is supplied by multiple worldwide underwriters and Marsh, Inc. provides program administration, supported by Captive Resources, Inc.

As demonstrated by benchmarking, the costs continue to remain below industry averages due to the program’s volume and asset protection strategies tailored to higher education institutions.

Some program highlights include:

- More than $10.2M was saved by participating institutions in the MHEC region.
- The 22nd Annual Loss Control Workshop included over 150 MPP participants including campus risk managers and fiscal officers, as well as personnel from campus legal, physical plant, facilities, and purchasing departments.

Upcoming plans include:

MPP Leadership is beginning to discuss 2021 renewal strategies. In addition a Captive Review Project is underway to review the future of the MPP captive and what it should look like.

**HEALTH INSURANCE SOLUTIONS**

The Compact’s student health insurance solutions program, MHECare, was created in conjunction with MHEC’s Student Health Benefits Advisory Committee, a network of institutional peers, health center professionals, and risk managers focused on student health. MHECare provides campuses that offer students a school-sponsored plan the flexibility to tailor plans specifically to meet the needs of their students with national carrier UnitedHealthcare StudentResources.

As states continue to adjust to changes due to the Affordable Care Act, MHECare campuses are well-served by a carrier that is compliant and fully equipped to rapidly respond to changes in regulations. Campuses can leverage MHECare knowing that MHEC has performed its due diligence through a comprehensive and extensive RFP process, enabling student health administrators the opportunity to spend their time focused on efforts that will directly impact and benefit students.

Similar to other MHEC programs, MHECare is also available to postsecondary institutions of MHEC’s sister compact regions in the New England Board of Higher Education (NEBHE), the Southern Regional Education Board (SREB), and the Western Interstate Commission for Higher Education (WICHE).

MHEC also provides an option with IXSolutions for private student health insurance exchanges for...
those institutions, in the MHEC region only, that are unable to offer a school-sponsored plan. Through a private health insurance exchange, campuses can offer students multiple coverage options, provide support from insurance experts, and save valuable administrative time.

Thirty campuses from across the U.S. participate for the 2020-21 school year through the option with UnitedHealthcare StudentResources and six campuses are providing the IXSolutions private exchange to their students. While enrollment numbers are not yet available for the current academic year, in 2019-2020, MHECare provided coverage to over 38,000 students.

Next steps include:

Student Insurance Solutions RFP. The Student Health Benefits Advisory Committee issued the MHECare Student Insurance Solutions RFP. The purpose of the RFP is threefold. First, the existing agreement with UnitedHealthcare StudentResources is nearing conclusion and requires bidding for the primary carrier offering student health insurance for institutions with school-sponsored insurance plans. Second, the current contract with IXSolutions that affords institutions the ability to offer a private student health insurance exchange is also nearing conclusion and requires bidding. Third, the committee is seeking providers that can offer institutions virtual mental health services.
MHEC’s approach to education technology contracts provides agreements that are a product of a representative group of stakeholders from the higher education technology community. A competitive sourcing process is conducted that leverages the potential purchasing power of the 12 MHEC member states. Most contracts are available to other regional compacts: New England Board of Higher Education (NEBHE); the Southern Regional Education Board (SREB); and the Western Interstate Commission for Higher Education (WICHE) member states.

The end result is a master agreement that facilitates a direct relationship between the technology providers and institutions and contains discounted pricing as well as terms and conditions that are better than most higher education institutions can negotiate individually. Established price ceiling for purchases, with additional discounts often available from vendors for special or large order purchases.

By entering into agreements for the benefit of its member states, MHEC provides institutions with a procurement tool that allows more flexibility while still maintaining compliance with applicable procurement statutes. MHEC has adopted a policy that requires MHEC contracts to be awarded based on competitive bid requirements that are consistent with the statutory procurement rules of the Compact member states.

The process is designed to minimize the burden on administrative resources for institutions in the 12 MHEC member states, saving both time and money, while expediting technology acquisitions. Competitive solicitations are integrated with the institutions’ procurement process that includes negotiated Master Agreement terms and conditions, licensing, and pricing. Additionally, it allows an institution to focus most of its energy on finding the technology solution that best fits its needs instead of the contract itself.

Current Contracts include:

- Computers: Dell, HP Enterprise, HP Inc., Lenovo United States, Lenovo Global, and Oracle
- Data and Networking Initiatives: Alcatel-Lucent/Dice Communications, Ciena/Walker and Associates, Inc., Dell, and HP Enterprise
- Printers and Peripherals: HP Inc. and Xerox
- Security Event and Information Management (SEIM): MicroFocus (Novell)
- Services: Info-Tech Research Group and Parchment
- Software: Arrow Electronics/CommVault, Arrow Electronics/VMware, Corel Corporation, Micro Focus (Novell), Oracle, and SAS

MHEC’s technology efforts saved entities in the MHEC region over $36.83M in FY20 and showed strong usage across all its technology contracts with over $585M nationally in sales.

MHEC continually develops strategic contracts that provide easier and quicker access to IT hardware, software, and services. Anticipated IT solicitations over the next year encompass digital credentialing solutions, research and advisory services, IT security services, and creative software. Each of the categories will be thoroughly researched, scope of the objective defined, vendor environment scanned, and input from the higher education community will be included.

Details on MHEC technology contracts may be accessed at: [https://www.mhec.org/contracts/technology](https://www.mhec.org/contracts/technology).

The following pages provide detail regarding our cost savings programs, budget, and lists of the many commissioners and committee volunteers who generously give of their time to support our programs and add significant value to our organization overall.

**Footnotes:**
2. Contracts include: Novell/MHEC Collaborative Program, Oracle, Corel, Arrow/VMWare, SAS, and Open Systems.
3. Contracts include: Info-Tech Research Group, Parchment, and CampusEAI.
4. Expired contracts include: office products, telecommunications, equipment maintenance, and academic scheduling, interactive video, and APN.
5. Based on premium and loss information as of June 30, 2020.
6. Iowa State University asked MHEC to bid their property insurance for FY 2009. The MHEC bid, with a much lower deductible, was $186,205 less per year than ISU was paying. ISU selected their current carrier at a price of $858,824 or $201,532 less than paid in FY 2008.
7. In 2009, 2012, and 2013, SD Office of Risk Management requested a quote for property insurance at six SD Regent institutions. Even though the SD Offices of Risk Management kept its current carrier, they indicated the MHEC quotes saved the institutions $85,000, $239,302, and $168,233 respectively.
9. Savings does not include personnel and travel cost savings.
